Process :

Step 1

Clip your two halves of the bauble together. Using your sandpaper, sand in X patterns all over the bauble to represent icicles. Wipe it with a cloth to remove any dust.

Step 2

Using your glue gun, glue two trees to the base of one bauble half, and glue 1 tree to the other bauble half. You can bend the trees slightly (as they're made from wire) so as they are straight.

Step 3

Pour enough snow into 1 half, to cover the bases of the trees and clip the halves back together

Step 5

Cut a length of macrame rope (or ribbon of choice) and wrap a small amount of sticky tape around the end tightly (like a shoelace) and thread through the hole. Tie in a knot and you have a beautiful icicle Christmas bauble!

Troubleshooting :

- **My cord doesn't fit in the hole**

I find that 3mm cord fits through the hole, once taped tightly. Although, if you are using cord which is larger than 3mm, it may not fit. In this case, I suggest using a small ribbon and folding it in half and then threading through the hole

There's nothing better than seeing how others have created their own piece, from one of my tutorials. I'd so love to see your finished project! Simply tag me on any of my socials. I've even linked them below to make it extra easy x

Alternative Products:

DIY and creative projects always allow for alternative products to be used for a completely customised look. Here are some other products which I recommend for this project.

*Measurements and quantity may vary

Mini Christmas Decorations
